

CS563 GAME PROJECT
THE MAN WHO SAVES THE
UNIVERSE

BY **A**BC STUDIOS

ATEŞ AKAYDIN
BUGRA M. YILDIZ
CEM MURAT TURGUT

Outline

- Plot
- Aim of the Game
- Features
- Game Engine Features

Plot

- Space Age passed, Galaxy Age begun.
- Nations become one singular entity.
- Struggle for power.
- A hidden enemy revealed.
- Human nations united against this threat
- A layer of molecules created by the compression of the human brain was set up to protect the world :D.
- Two great Turkish warriors lead the defense

Aim of the Game

- You are sent by the world union to save the universe.
- You find yourself in a brutal space battle against the unknown enemy.
- You are in the role of a Turkish captain who controls a space ship to survive this brutal battle.
- Lead by the two Turkish heroes Murat & Tayfun

May the force be with you!

Features

- **General Features**
- **Rendering**
 - Modelling
 - Texture design
 - Shaders
- **Multimedia Content**
 - Video & Sound
- **Animations**
- **Artificial Intelligence**
- **User Interface**

General Features

- General Features
 - Variety of Ships
 - ✦ Fighters, Bombers, Cruisers, Battleships
 - Component Based Design
 - ✦ Guns, Turrets, Shield Generators, Engines, Comm. Antenna
 - Destroyable Components
 - Variety of Guns
 - ✦ Autocannons(Fast firing, low damage, high bullet speed)
 - ✦ Lasers(Slow firing, high damage, slow bullet speed)
 - Bypasses shields generators

Rendering - Modelling

- Modeling: 3d Studio Max
 - Spaceships

Rendering - Modelling

- **Modeling: 3d Studio Max**

- **Ship Components**

- ✦ **Guns & Turrets**

- ✦ **Engines, Shields & Comm. Antenna**

- **Bullets, Lasers, Missiles**

- ✦ **Bullets & Lasers as Billboards**

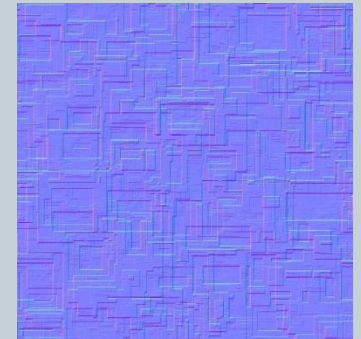

Rendering – Textures Design

- Textures: GNU Image Manipulation Library(GIMP)

- Diffuse Textures

- Gloss Maps

- Normal Maps

- High Resolution Skyboxes

- ✦ Hubble Telescope
- ✦ Spherical Mapping(3ds Max)
- ✦ Exported as Skybox

Rendering – Shaders

- Shaders – CG
 - Custom Shaders
 - ✦ Planet Shader
 - Rim Color
 - Adds w.r.t. $\text{dot}(\text{viewDir}, \text{normal})$
 - Maximizes at borders
 - Cloud Map
 - Blended & Animated UV
 - Night Sky
 - Blends w.r.t $\text{dot}(\text{LightDir}, \text{normal})$
 - Built-in Shaders
 - ✦ Phong Shading
 - ✦ Normal Mapping
 - ✦ Gloss Mapping
 - ✦ Post-Processing Effects
 - Glow Effects
 - Sun Flares

Multimedia Content – Videos & Sounds

- Video Editing: Adobe After Effects
 - ✦ Green Channel Toning
 - Cockpit colors
 - ✦ Salt & Pepper Noise
 - Realistic Comm. Interference
 - ✦ Alpha Channel
 - ✦ Quicktime Movie Format

- Sound Editing: Audacity
 - ✦ Guns
 - ✦ Engines
 - ✦ Hit Effects
 - ✦ Ambient Sounds & Music

Wing Commander Murat

Animations

- Particle Systems
 - ✦ Engine Exhaust
 - ✦ Hit Effects
 - ✦ Explosions
 - Detonator Framework
 - Ben Throop, Summer of Code
- Rigidbody Animations
 - ✦ Turret Tracking
 - ✦ Rotating Turrets & Muzzle Flashes
 - ✦ Celestial Motion
- Physics Based

Animations

- **Physics Based Animations**
 - Integrated Nvidia PhysX Engine
 - ✦ Ship Controls
 - Torque(Yaw, Pitch, Roll)
 - ✦ Drag Force(Constrained Velocity)
 - ✦ Engine Impulse
 - Collisions
 - ✦ Compound Colliders
 - Box Colliders
 - ✦ Rigidbody Collision Response

Artificial Intelligence

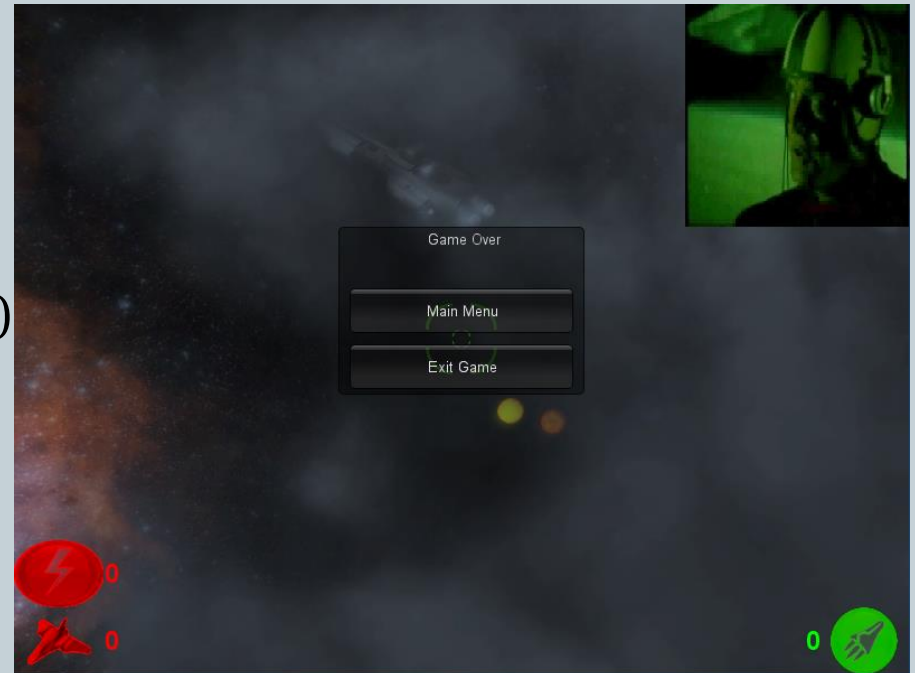

- **Rock, Paper and Scissors Model**
 - Battleships -> Cruisers
 - Cruisers -> Fighters
 - Fighters -> Bombers
 - Bombers -> Battleships
- **Smart Turret Tracking**
 - Grid Based Space Subdivision
 - ✦ Randomly picks closest targets
 - Aims w.r.t component priority
 - ✦ Shield Generators > Turrets = Engines > Comm. Antenna

User Interface

- GUI
 - Status Indicators
 - ✦ Armor, Shield, Speed
 - Crosshair
 - Comm. Channel
 - ✦ From Tayfun & Murat
 - Unity Menu Interface
 - ✦ (Pause Menu, Main Menu, etc.)
- Keyboard Interface
 - Ship Controls
 - ✦ Roll, Pitch, Yaw, Thrusters
 - Fire Controls
 - Camera Controls
 - ✦ Freelook
