

FAVEO

What is Faveo?

An Android quiz application that visually challenged people can use easily.

Our Mission

Developing an application that aims to provide fun and educational time to fully or partially visually challenged people.

Key Features:

Accessibility Features:

- **Text to Speech:** It is possible to use the application without seeing the screen.
- **Voice Control:** User can easily interact with application via speech recognition.

Image to Text: It is possible to upload new questions simply by using images.

Easy Interface: Interactive and user friendly interface to ease the usage especially for partially visually challenged people

Supervisor: Uğur Doğrusöz
