

About Us

As Toproffer we enable restaurants to create campaigns which are shared with customers through our application.

Mapping tools that are integrated in our application enables customers to have direct access to food and beverage outlets near them, while establishment owners are provided with graphical data analysis.

We provide momentary and permanent campaigns which allows owners to reach a greater number of customers.

Why choose us?

User friendly interface

Discovering unheard and unseen opportunities

Establishes shortest path to desired restaurant

Giving analytical graphic data on promotion code usage

Bringing customers & restaurant owners together on a single platform
