

ShareInHappiness

Health care is one of the most important human needs. High quality healthcare saves millions of lives and provides people with a sense of safety and security. ShareInHappiness is a welfare platform. Each user will have a wallet and he/she will be able to load money into this wallet. If users have sufficient credit in their wallet, they can purchase one or more items listed by the people who need special devices and medications. There will be no direct money transaction between the users so this will prevent the scammers from abusing the platform.
