Educational video
conference platform

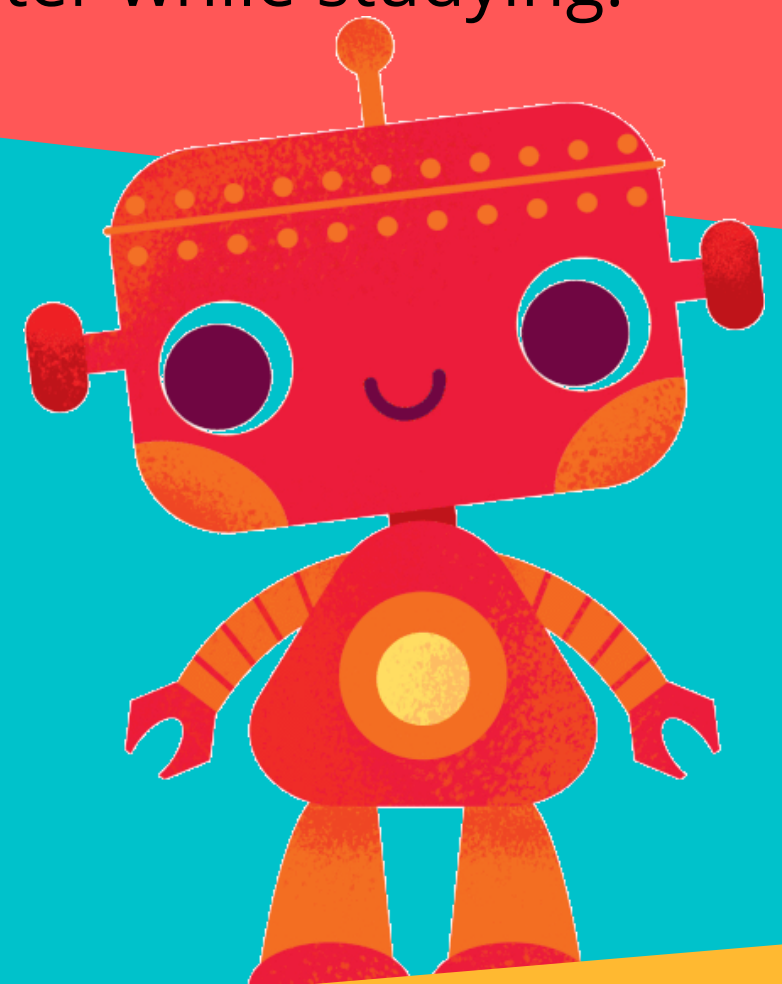

Do not waste your time taking note
on an external tool

1. **Draw, type**, put the **screenshot** of the page on your **virtual notepad**.
2. **Save** your **notes** so that you can always come back to see them later while studying.

Enhance the learning experience
with a proctor powered by machine
learning algorithms

1. Get **notified** when you seem **distracted**.
2. Track how well your lecture went with the student **analytics** after each session.
3. Get **notified** when students **raise their hands**.

Navigate freely on instructors slide

1. Instead of asking the instructor to go back, **navigate through the slides without interfering the lesson**.
2. **Catch up** with the lecture content, then easily **sync back** to teacher's current slide.
